> MODS Decommissioning Brochure

> MODS Connect mitigates decommissioning risks & challenges, including:

- > Ineffective handovers, loss of archival information and data gaps.
- > Ensuring suitable equipment, materials and people are to the correct specification and in situ as needed.
- > Balancing competing workflow priorities.
- > Navigating reams of paper & massive hard-copy dossiers for information.
- > Communicating and clarifying contractor responsibilities.
- > Transferring site-specific knowledge to the contractor.
- > Ensuring contractors follow the work plan and are accountable.
- > Avoiding conflicting or potentially dangerous simultaneous operations.
- > Visibility, management and traceability of critical equipment reuse such as cleaning and flushing status.
- > Delays caused by obtaining approvals & signoffs.

> Digital Decommissioning in the North Sea

> Challenge:

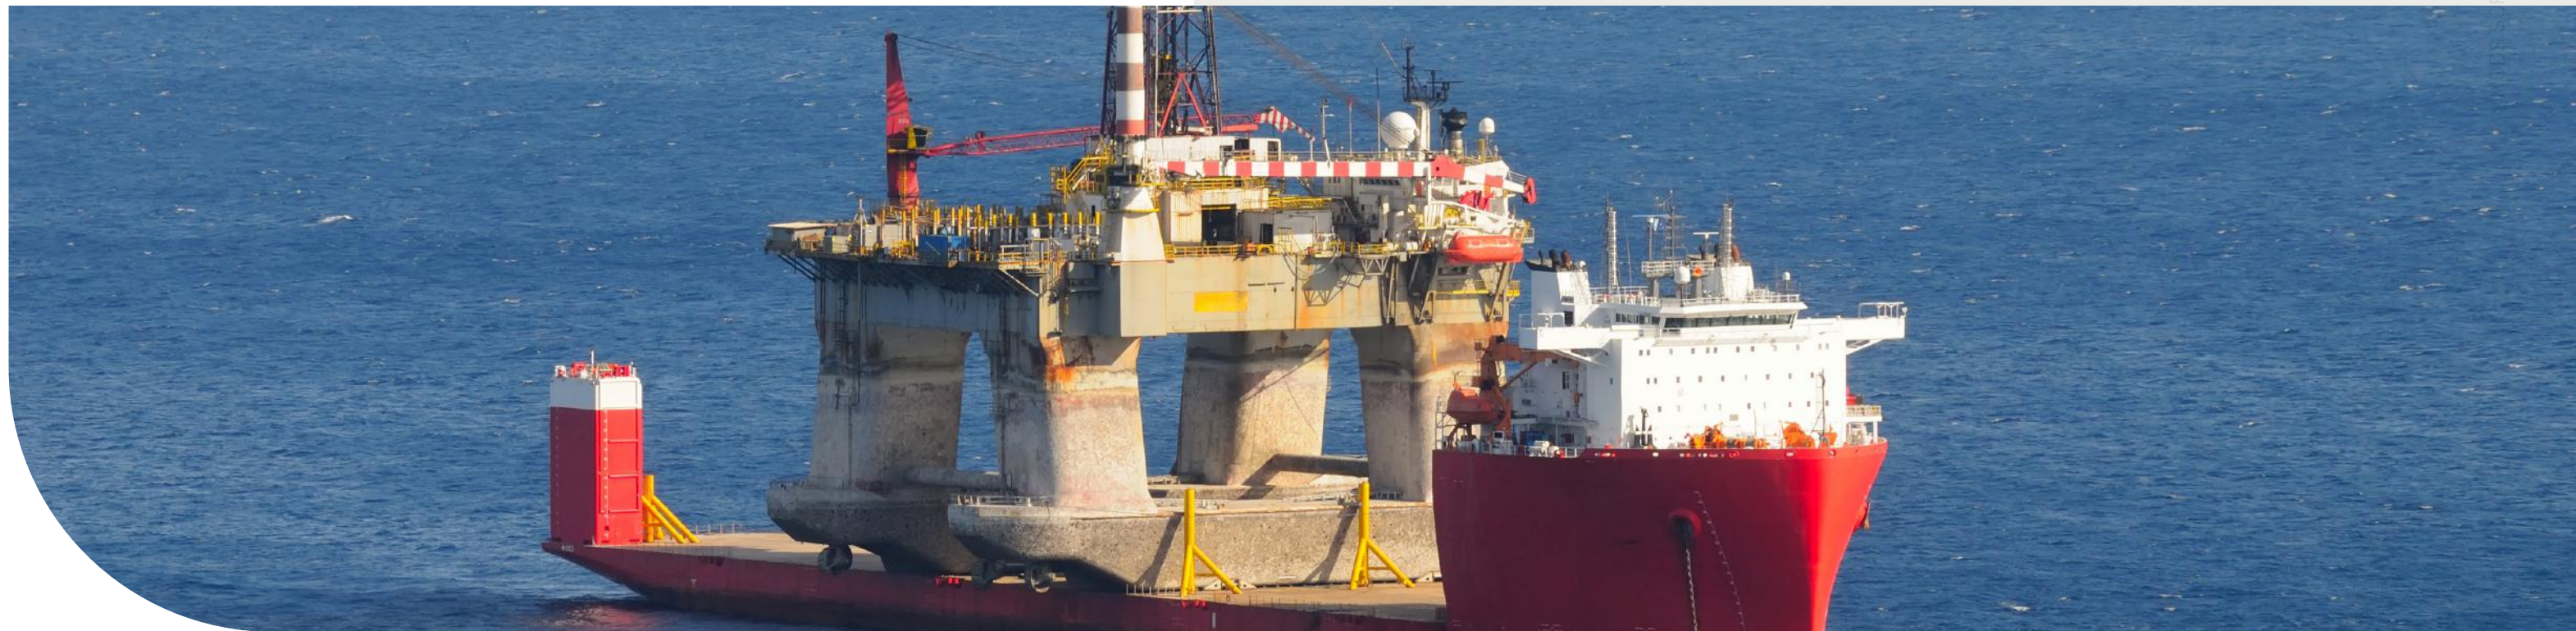

Data visibility in the offshore decommissioning of a North Sea platform.

> Solution:

MODS Connect Completions

> Impact:

Delivering full control and visibility during construction, deconstruction and commissioning activities. Ensuring a safe working environment and a fully documented and compliant handover process prior to final removal of the aged asset.

> MODS Decommissioning Brochure

> Digitalize your Decommissioning

Decommissioning is a notoriously challenging phase in an asset's lifecycle. MODS Connect makes decommissioning work traceable, holds contractors to account, mitigates mistakes and decreases the project's expenditure and footprint.

Decommissioning of infrastructure is often more complicated than the original installation and is subject to a wide array of governance and scrutiny. MODS Connect eliminates paper from decommissioning workflows, ensuring status and archival information is transparent and accessible.

Use MODS Connect for efficient, compliant, traceable decommissioning, with the following paperless processes:

- > Visualization data hub
- > Work packs
- > Materials management
- > Completions

> Digitalize your Decommissioning Projects

An integrated, modular solution, the following MODS Connect modules help execute decommissioning projects, ensuring processes remain compliant, on schedule and transparent.

> MODS Connect Materials

Intelligent inventory control of materials, equipment and components to ensure delivery on time, in sequence and to the correct location.

> MODS Connect WorkPack

Digital work packs ensure more intelligent, transparent and accountable project execution.

> MODS Connect Completions

Facilitate a controlled, staged transfer of responsibility back to the owner-operator via an intelligent centralized database.

All MODS Connect modules feature activity management with interactive scheduling and visible SIMOPS for integrated work front management.

> Digitalize your Decommissioning

Digitalizing your decommissioning projects with MODS Connect interactive cloud-based solution enables remote management of site work.

MODS Connect takes the uncertainty out of decommissioning by digitalizing workflows associated with work packs, materials and completions so that your projects flow in a predictable and streamlined manner.
